

BP-Auth:

Flexible Authorisation Platform

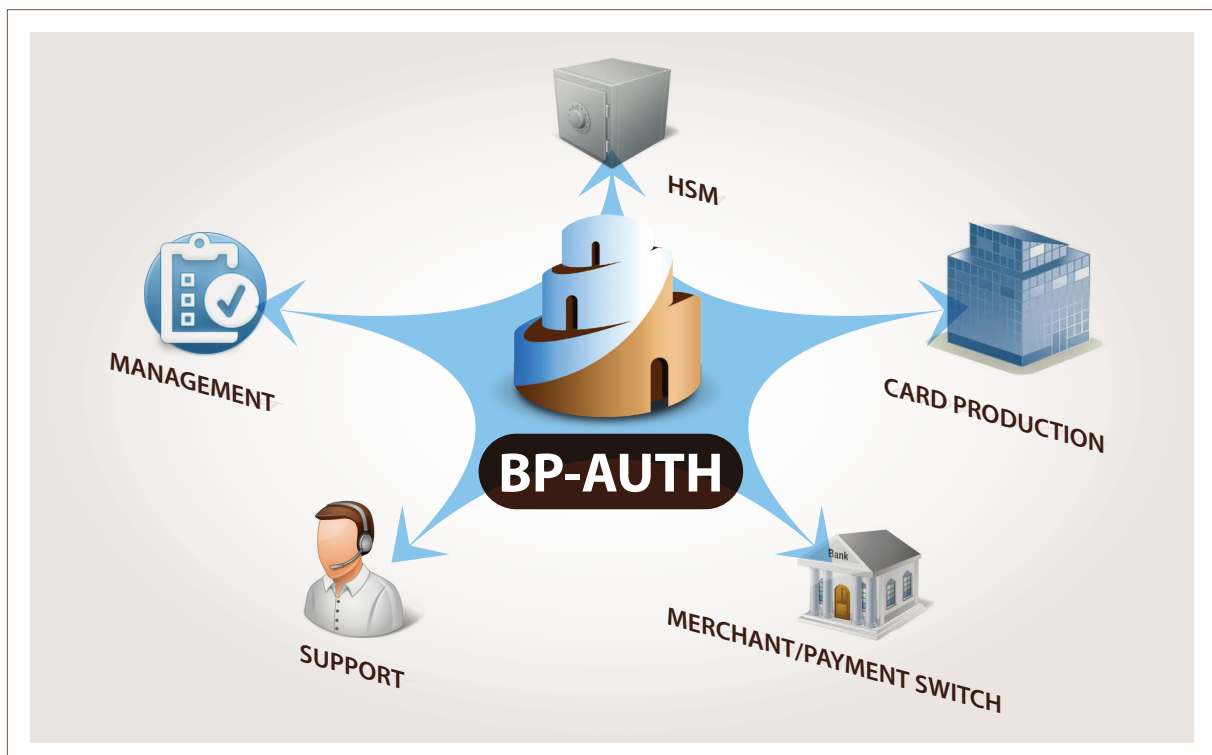

Are you a bank, merchant or payment service provider?
Are you running a card authorisation or loyalty program and looking for ways to reduce licensing and support costs? Would you like to find a better way to move forward in this demanding market?

EFTlab's BP-Auth is a flexible authorisation solution that reduces the time to market for payments products, facilitates product innovation for customer retention and drives down bottom line costs.

BP-Auth is a suite of flexible and cost-effective products providing the following benefits:

- Practical and efficient card production
- Payments authorisation
- PIN management
- Compliance with PCI:DSS 3.1 and PA:DSS 3.1 requirements
- EMV and NFC ready
- Support for a range of loyalty functions
- Service oriented architecture to quickly extend functionality

BP-Auth:

Flexible Authorisation Platform

BP-Auth Configuration Options:
